

JEE Main 2019 Preparation Video Series “JEE Ki Pathshala” Launched By AglaSem

AglaSem has started a biweekly youtube video series on JEE Main 2019 Preparation covering study tips, timetable to follow to score high without coaching, important topics, cut off analysis, and much more.

Gurgaon, Aug 30, 2018 (Issuewire.com) - Joint Entrance Examination (Main) is one such national level exam, about which every engineering aspirant of India knows about. JEE Main, from 2019, is being conducted by National Testing Agency (NTA), a newly formed body under the Government Of India. Central Board of Secondary Education (CBSE) has been relieved from the pressure of conducting many major national level exams and JEE Main is one of them.

However, with the announcement of the change in the conducting body, it has been made clear that the exam pattern and syllabus will remain the same. Therefore [JEE Main 2019](#) will have paper 1 for B.E. / B.Tech admissions and paper 2 for B.Arch admissions. The paper 1 is for 3 hours and shall contain MCQ type questions. The question papers will be available to the candidates in Hindi, English and regional languages.

2019 is a year of change for JEE Main, aspirants are now facing added trouble in preparing for this exam. This is because NTA has proposed few changes like holding the computer-based test only and twice a year.

Obviously, these revolutionary changes have zoned the students in a tough spot where they are mostly confused on attempt limits and wondering whether the new exam conducting body will

increase the level of the questions. In addition to that, they are worried about how to appear in the online mode of the examination.

The engineering team at AglaSem, that has been helping students for a decade, had been receiving a huge number of queries from the aspirants on a daily basis. The team is working round the clock on these queries, to be able to provide timely support to harried students who will appear in JEE Main 2019.

In this direction, the company based in NCR is regularly providing updates in the form of latest news, articles, and videos as well. Comments in the news, as well as videos, are answered in order to resolve all doubts that candidates are facing.

The AglaSem engineering education portal, engineering.aglasem.com has a pool of JEE Main articles that are knitted around many important aspects of the examination to name a few - latest reports, updates, FAQs, eligibility, exam pattern, syllabus, preparation tips, important books, study plan etc.

Now the AglaSem YouTube team has launched a JEE Main 2019 video series titled “[JEE Ki Pathshala](#)” that is helping thousands of subscribers with their exam preparations. Every week, 2 videos are being uploaded to the Youtube channel, which covers JEE Main preparation and all the topics that students are most frequently looking for. “Like a friend, we are there with important tips to make these days a bit easier for the aspirants”, says Kirti, who is orchestrating the video series. She adds, “We are constantly looking forward to coming up with out of the box and innovative ways to approach the queries that we get. JEE Main is a big phase in a future engineer’s life. It is the stepping stone towards their upcoming career as an engineer. Thus, to make things easy to understand and with a tint of “fun” - JEE Ki Pathshala” aims to help out the viewers”.

The series contains videos on preparation plans and how to go about it, discussions on important topics, helping the students fill their JEE Application form, live sessions on important topics, analysis of cutoff and difficulty levels and much more. These videos are made live every week on Mondays and Fridays.

“Why are our videos hit with the students? Well, this is because we try to be personal and try to understand what the student needs at this point in time. Thus catering to those needs gives our content the edge”, says Mamona, who is looking after the AglaSem engineering education portal.

YouTube videos are the best way to talk to the students and get their instant feedback. This helps the team to improve and come with better viewer oriented content each time.

“I urge more students to watch the JEE Ki Pathshala at AglaSem Youtube channel. You can express your concerns and we will make sure to address them in the upcoming videos.”, Mamona adds.

Creating 5-10 minutes video around doubts of students makes the videos worth the time for students all over the nation. With each session, students inch closer towards their goal to learn more and better in their academic life.

With JEE Main registrations starting soon on September 01, 2018, AglaSem is also keeping a track of all updates on [NTA](#) and their moves. The one-stop student help portal and Youtube channel are leaving no stone unturned to be the first to capture any new information so as to analyze them with the team and present it to their readers and viewers. More than 11 lakh candidates appear in [JEE](#)

[Main](#) every year. The Edutech company that works on the motto of “updated, authentic, free” not only covers the pre and post-exam updates but tends to go deeper. For example, analysis after the exams are over, what went wrong, why cutoffs are dipping in JEE over the years, why lesser and lesser students are qualifying the advanced level are also covered.

Thus, the learning is never ending at AglaSem. Since its inception, AglaSem has managed to become the largest student guidance portal. AglaSem has branched over to various aspects of education like Schools, College admissions, Entrance Examinations (Medical, Engineering, Law, MBA), Career, Government Jobs, Education News etc. The aim is to provide updated and free resources to each and every student.

Readers and viewers are invited and encouraged to voice their opinions at aglasem.com, as opinions matter the most, especially about education - one of the major building blocks of any nation.
