

Buy and Sell Crypto Currency Peer to Peer

London, Oct 21, 2018 (Issuewire.com) - Buy Crypto Currency Peer to Peer (P2P) exchange

There are two types of exchanges used to buy cryptocurrency: Peer-to-peer and regular exchanges. Every buyer needs a secure transaction to feel safe when buying crypto; this is why crypto platforms are adopting the best exchange approach that guarantees safety in crypto transactions. As a buyer, you need to go with a platform that assures you of using Peer-to-peer as practised by coinxes.com to securely provide hassle-free exchanges for their traders.

Understanding Peer-to-peer buy cryptocurrency exchange

When you use coinxes.com, you have only three steps to buy cryptocurrency without much ado successfully. The platform is built on the belief that cryptocurrency should give two people involved in exchange the freedom to choose. What happens is that the sell cryptocurrency initiator has the right to determine what he wants with his deal. He sets the price, payment method and other conditionality. in this regard, the buyer and seller are matched and once the buyer accepts seller's terms, the trade takes place and payment made and the deal closed!

To further guarantee safety and hitch free exchange, coinxes.com uses an escrow account for safe keep of the seller and buyer funds where the buyer gets his crypto sent directly to his account, and the seller gets his money accordingly.

Features of coinxes.com peer-to-peer cryptocurrency exchange

- Secure transactions. It uses P2P exchange, and the platform doesn't store crypto making it hacking free!
- Buy and sell digital currency. It offers P2P private and censorship free transaction, guaranteeing fast and easy to Buy and Sell exchange with a reputation-based system and arbitration.
- Individuals create their own trade. It allows the creation of unique crypto transaction according to individual preferences like amount, location, a method of payment and other personalized options.
