

Ecuron aids InfiniGlobe in achieving flawless ISO 27001 Information Security Certification

Ecuron's innovative Leveraged Information Security Services partnership enables InfiniGlobe to ensure information security, data integrity, and availability through ISO certification with great efficiency.

Houston, Oct 11, 2018 (IssueWire.com) - Ecuron Inc., an innovative, independent Information Security, and Cybersecurity Consulting Company, today announced that partner InfiniGlobe LLC has been certified as ISO/IEC 27001:2013 compliant with zero non-conformities, demonstrating protection of InfiniGlobe assets and information. Partnership with Ecuron and reliance on Ecuron's unique Leveraged Information Security Services (LISS™) enabled this outstanding result in a highly efficient manner.

InfiniGlobe is committed to safeguarding data confidentiality, integrity, and availability and chose to become certified to ISO 27001. ISO 27001 is the most rigorous and most widely recognized international standard for the management of the security of information assets. Key to certification is the implementation and use of an Information Security Management System or ISMS. An ISMS is a systematic approach to managing sensitive company information so that it remains secure. Such a system includes Cybersecurity and Information Technology (IT), and more broadly it includes people, processes, systems, and comprehensive risk management.

Ecuron has extensive expertise in this area, leading InfiniGlobe to choose to partner with Ecuron and benefit from Ecuron's Leveraged Information Security Services (LISS™). Working with Ecuron, InfiniGlobe employs vital administrative, technical, and physical safeguards including personnel screening, physical and environmental security, IT operations, asset and information management, ongoing security training, and risk assessment.

"Our perpetual drive to deliver the highest quality and most secure experience to our clients and partners around the world is reflected in the successful completion of our ISO 27001 certification", stated Mori Kabiri, president and CEO of InfiniGlobe LLC. *"Working with Ecuron was essential to this success."*

Ecuron's president, George Kiersted, said *"Initial certification with a perfect score is a major accomplishment, demonstrating InfiniGlobe's commitment as well as the power of our Leveraged Information Security Services. Ecuron's LISS™ is an innovative way for our partners to benefit from our expertise in furtherance of their information security objectives, and we are thrilled to see the success of InfiniGlobe."* Kiersted added, *"InfiniGlobe went above and beyond to adopt best practices and their clients may confidently rely on them and our partnership to protect the confidentiality, integrity, and accessibility of their sensitive data."*

Information Security Certification Becomes Critical Vendor Requirement

Information Security certification has become a critical requirement for organizations across the globe which must protect their sensitive information. This requirement extends to vendors and partners with whom the organization works. As a result, more and more enterprises require ISO/IEC 27001 certification for those with whom they do business. By achieving ISO/IEC 27001 certification, InfiniGlobe is poised to provide its services to a broad array of potential customers with such requirements.

About Ecuron, Inc.

Ecuron is a global boutique information security and cybersecurity consulting company with headquarters in Houston, Texas. Born out of the professional collaboration of a team of cybersecurity veterans, Ecuron's mission is to secure its partner's data and protect them every step of the way through its Leveraged Information Security Services (LISS™). Ecuron specializes in efficiently yet rigorously preparing its partners for ISO/IEC 27001/27002 certification and through ongoing partnership to maintain security, adapt to changing needs, identify and respond to emerging threats, and work with management in continuous support of compliance.
