He has his own production house labeled as Rotation Records.

His latest track '[Afterlife E.P.](#)' is one of a kind song. Even though his songs are from the hip-hop and rap category there is a kind of uniqueness about his songs. The song starts with slow beats followed by flawless rap and a slow melody is induced in the background that is carried put through his song. As he mainly follows alternative rap his songs are a blur of hip-hop followed by jazz-soul melody etc. Some of his other tracks are 'In the sky' 'In my mind' 'Electric vibes' etc. all of his compositions are diverse from each other. They are all available on Soundcloud.

Hailing from the United States he is truly an asset to his country. At fifteen he is remarkably talented for any guy his age. He has over five hundred followers on Soundcloud and keeps a humble

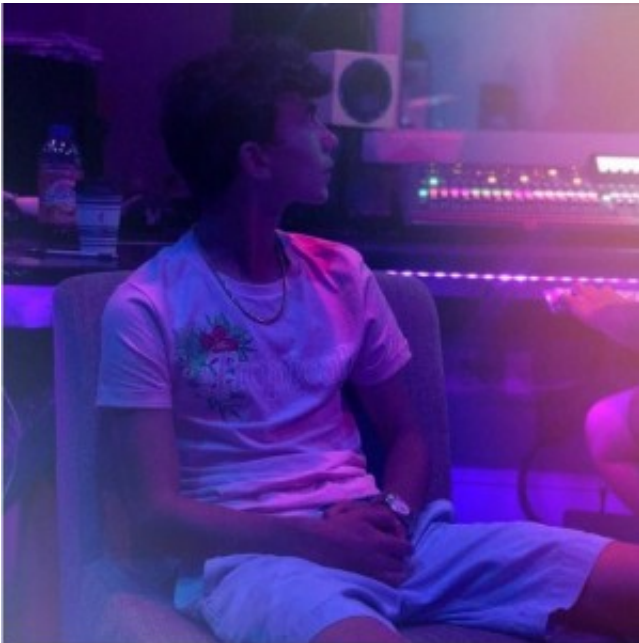

relationship with them. He is trying to bring the music lovers a new kind of music and he is succeeding in that. He may not have the exposure yet but he is surely going to establish a mark on the music industry pretty soon. He is an inspiration to the boys his age. He is one of a kind talent.
