

## Plasma Cut: A One-Stop-Solution for All Steel and Engineering Needs

**Wadeville, Oct 10, 2018 ([Issuewire.com](http://Issuewire.com))** - Plasma Cut has always aimed at providing the best engineering services to all their clients. To ensure accuracy, their fabrication process and products undergo a series of checks to ensure accuracy, quality and design conformance. Committing to customer service, they undertake continuous evaluation and improvement of the technologies they use.

[Plasma Cut](#) is a leading supplier of stainless steel sheets and related products in South Africa. A renowned laser cutting service provider, the company offers reliable services at competitive prices.

### **Services Provided By Plasma Cut:**

Plasma cut offers a range of reliable laser cutting and fabricating services at competitive prices, such as:

- **Laser Cutting** – Housing some of the best laser cutting machinery, they provide efficient laser cutting services. Their services include cutting of both mild steel and stainless steel, in a variety of thicknesses, ranging from 0.50mm to 25.00mm.
- **Hi-Definition Plasma Cutting** – Plasma Cut provides accurate hi-definition plasma cutting services. They house two plasma cutters especially for hi-definition cutting. This enables them to

produce excellent results with minimum tapering of the edges.

- **Guillotining Laser Cutting** – Plasma Cut also provides guillotining laser cutting where they slit flat bars into different thicknesses. They offer cutting in thicknesses ranging from 0.90mm to 12.00mm.
- **Chamfering Laser Cutting** – Chamfering is the process of cutting a groove, bevel or furrow on an edge of the material. Plasma cut provides highly accurate chamfering services.
- **Rolling and Bending** – Catering to all fabrication needs, Plasma Cut also provides rolling and shaping of bars, cylinders, angles and sections. Their services are available in a range of thicknesses from 0.90mm to 25.00mm. Along with rolling, they also offer flexible bending services which can reach lengths of 6 metres.
- **Others** – Apart from the services mentioned above, Plasma Cut also offers brush polishing and PVC coating, drilling, machining, tapping and straightening services.

### **Products Offered By Plasma Cut:**

The Company offers various manufactured products for sale which can also be customised according to the needs of the client. Their product range includes:

- **Flanges** – They offer flanges cut, forged or machined from a disc of steel. They supply both standard and specially sized flanges.
- **Cylinders** – They manufacture cylinders as per the client's specifications in varying thicknesses.
- **Cut to size Plates** – Employing the best technology and equipment, they also manufacturer cut to size plates and sheets.
- **Channels** – Plasma Cut manufactures a variety of channels including J-Shaped, Lipped and bent to specifications.
- **Pipes and Bars** – They supply round, flat, hollow and seamless pipes in varying lengths, angles and thicknesses.
