

# Take Off Pilot Training Institute Is Offering Commercial Pilot Training Program In Delhi

## Commercial Pilot Training Program

**New Delhi, Oct 29, 2018 ([IssueWire.com](http://www.IssueWire.com))** - Take Off Pilot training institute is one of the leading aviation training institutes in Delhi. The institute has now started **a commercial pilot training program** in Delhi. This course is for those aspirants who want to become a commercial pilot. The institute has the finest faculty to impart training for this course and supporting infrastructure in place.

Giving more information about the course the Executive Director of Take Off Institute Air Commodore R Z Qureshi VSM (RTED) said, “The **[Commercial Pilot Training Program](#)** of taking Off has been designed by the experts in the aviation industry with an intent to impart the finest training to students who want to become the commercial pilots. Our training program is of international standard and focuses on both on ground training and flying. We give attention on every student to bring out the best pilot out of them.”

The **commercial pilot training program** of Taking Off comprises of general knowledge of aviation management, different types of aircraft, various terminologies used in aviation or general aircraft. Students get the knowledge of stimulators, 50 hours of contact tutorials, 50 hours of theory study. During the course, they are also prepared for abroad license and flying.

The institute not only trains students how to fly aircraft, but also teach them how to handle difficult situations. After completing the course from the institute, students get the Commercial Pilot License as well as the transport Pilot License according to the DGCA norms.

## All About Take Off

The Take Off is one of the best pilot training institutes in Delhi and NCR. The institute is governed by retired professionals of airlines, thus the institute is able to build the solid foundation of flying in students aspiring to become a pilot. The faculty imparts the world-class training in flying and offer the course at an affordable cost. The institute offers four different courses related to the aviation industry, flying training, ground training, type rating and airlines preparation.
