

“The Complicated Simplicity” Reclaiming Your Will

In this book WJ Daggins aims to simplify the understanding of life’s complicated situations. He gives you a basic understanding of why you may be going through challenges and gives you ways to regain control to “get out” with your mind still intact.

Fort Lauderdale, Oct 18, 2018 (Issuewire.com) - WJ Daggins is the founder and visionary of Here To Inspire, Inc of Florida. A corporation that was created to influence and capture the hearts and minds of the next generation. He has been self-employed for over 10 years owning two small businesses and over that span, employing over 30 individuals. These years of management experience and work

relationships with both customers and workers have given him the opportunity to observe and influence the thoughts and mindsets of people around him.

Many have come to trust in his ability to operate professional business and services. Throughout daily conversations, most who had interactions with him realized that there was more to him than simply his business skills. Life for WJ before his years of business was quite unique, filled with mistakes and hardships. Bad choices and the consequences that followed. Through realization and Godly teachings, he realized that most of his issues and hardships were a result of the things he chose. Not understanding the full effects of his choices, he ended up in bad situations. He often wished that there were more people willing to offer more positive influence and real insight to the things that he was to face and what real consequences he might face if he would choose those paths.

In Here To Inspire Inc mission statement it says they hope to help pull others higher without judgement. No matter where you have begun, we know that with God and persistence, nothing will be impossible for you. Being able to see things from others points of view and having learned from his own mistakes, he believes he is able to give others the opportunity, to be honest with themselves through his honesty and examples.

He believes that it is his purpose to help others realize ways in which they can see themselves and understand that they have the power to change the outcomes of their situations.

WJ Daggins travels around the nation and abroad. He works with children and teens and adults in volunteer efforts. Many trust his ability to see things for what they are and the way he shoots straight in any situation to find a fair, understanding and suitable solution. WJ is often described as adventurous, spontaneous, honest, perspicuous, understanding, willing, humble, forgiving, and resourceful.

He has a love for all people and a true understanding that things happen for a reason. No matter a person's circumstance, everyone deserves the right to be understood.
