

Buying, selling property in Mashhad

Do not be deceived the gang of builders and dealers in the elahiye area

Mashhad, Nov 2, 2018 (Issuewire.com) - Do not be deceived the gang of builders and dealers in the elahiye area.

According to Arash, field surveys show that the housing market has been out of recession, although not all experts are unanimous in this regard, as well as reports that prices have not risen by more than thirty percent. Sales files did not grow much compared to September, and we would like to compare with

other areas of Mashhad. We see that all areas of growth have a reasonable price than the goddess. Therefore, after analyzing Arash Modir, we found that on the site and wall app, duplicate numbers The number of instant ads from the same numbers as the bubble rise in price Maine and apartments are being built by real estate agents who are the builders of the region and after selling their land and apartments to real buyers at unrealistic prices, they lower rates and buy the same property at a low price, and in fact this The farther away is the deal.

These games have become a concern for some buyers because, with a false increase in the price of land and apartments in this area, the market will actually rebound.

Following the questions and issues our customers have to answer:

Most of the real estate offices in the Al-Ahwi district are the same builders in the region who try to maintain their best interests in the form of real estate agencies and then go out of the region after the recession. However, they believe that the price of this neighbourhood will increase from other neighbourhoods, which this The problem is without knowing how to grow urban areas.

Therefore, we hope that the regulatory agencies, as well as the Mashhad Real Estate Union, will entertain the peaceful buyers of land and housing.
