

Campervan Gift Vouchers - The Quirkiest Adventure Gift This Christmas

Leicester based campervan conversion company takes outlandish step of offering Christmas gift vouchers for anything up to £45,000, for a complete campervan custom build!

Leicester, Nov 20, 2018 ([IssueWire.com](http://www.issuewire.com)) - Jack's Shack, a Leicester UK based campervan conversion company has taken the outlandish step of offering gift vouchers for anything up to £45,000, for a complete campervan custom build!

The small but innovative company, based just a mile from the centre of Leicester, came up with the idea of really getting people involved with their build via Christmas voucher, earlier in the year and couldn't wait to roll it out once the season came around.

The company's idea will enable those with little understanding of how a campervan comes together, or which elements to choose for their loved one's special machine, to give the gift of freedom. Freedom to choose every colour, spec and detail of their custom camper.

One of the company's owners, Chris Goodson said of the idea that "We're sure it'll make for a Christmas to remember, for anyone lucky enough to get a voucher in their stocking. To us, it seems like the perfect gift idea!

"And it'll certainly be the gift that keeps giving, as anyone possessing a voucher will be able to come to the workshop, choose every element of their van and watch it come together. We love doing the more 'outthere' builds, so would be made up if someone wanted a Christmas themed van! So far this year,

we've done a Paul Smith style pinstripe floor, automatic roofs - allsorts!

"We all love campervans and we all love Christmas, so we thought this would be the perfect stocking filler", he ended with a smile.

Jack Shack is offering vouchers not only for brand new conversions but also, for those wishing to spend a little less, on older VWs and on single upgrades.

About Jack's Shack

Based centrally in Leicester UK, Jack's Shack creates brand new VW campervans and refurbishes 1950s and 60s American trucks. The team loves the mix of new and old, as do the customers, who see real craftsmanship in their work with both new and old.
