# New Group to Increase Representation of Minority Voters and Consultants

**Eshkashem, Jan 1, 1970 (**Issuewire.com**)** - Many modern alternatives often incorporate humor or other content that actually detracts from the primary purpose of filler text: to be unobtrusive, yet provide the feel, look, and texture of filler text. Our advice: use filler text that has been edited for length and format to match the characteristics of real content as closely as possible To avoid creating a distraction, when starting a new design project, we always go back to one of the old mainstays: lorem ipsum or li Europan lingues. Both have realistic-looking sentence structure and word shape, but are foreign languages that won't create a distraction during a design review meeting.
