

Brian L. Rozanski, DPM, Podiatrist with West Suburban Podiatry

Get to know Podiatrist Dr. Brian L. Rozanski who serves the population of Illinois.

New York City, Mar 12, 2019 (Issuewire.com) - Board Certified Surgeon and is a Certified Wound Specialist Dr. Rozanski currently practices with West Suburban Podiatry and the Amita La Grange Memorial Hospital Wound Care Center. Dr. Rozanski's philosophy is to treat the patient and not just the pathology to have a successful outcome.

West Suburban Podiatry is a practice that prides itself on providing top quality foot and ankle care. Our goal is to have your foot and ankle issues resolved so that you may improve your quality of life. They offer surgical and non-surgical treatment plans that are customized to your specific needs. West Suburban Podiatry has served the community since 1985. They have their own in-office X-rays to assist in efficiently diagnosing the conditions of their patients.

The AMITA Health Center for Wound Healing is a leading provider of outpatient wound care with an excellent success rate. The certified wound specialists in their hospital-based program use the most advanced treatments available and work as a team to heal your wound. They coordinate care with our other specialists — and they'll even arrange transportation and home care.

Dr. Rozanski completed his undergraduate degree from the University of Wisconsin LaCrosse in 1995. Furthering his education he graduated with his Doctorate of Podiatric Medicine from the Scholl Institute in 1999, giving him over two decades of experience in his field. After obtaining his medical degree he completed a three-year Podiatric Medicine and Surgery residency at Illinois Masonic Medical Center in Chicago. He holds certification from the American Board of Podiatric Surgery.

When not working, Dr. Rozanski enjoys spending time with his family and is active as a coach for his children's sports.

Podiatric medicine is a branch of the medical sciences devoted to the prevention, diagnosis, and treatment of foot disorders resulting from injury or disease. The human foot has a complex interrelation with the rest of the body, which means that it may be the first area to show signs of serious conditions such as diabetes and cardiovascular disease.
