

Michael Adler, DO, Osteopathic Manipulative Medicine with Flushing Physical Medicine and Rehabilitat

Get to know Osteopathic Manipulative Medicine Dr. Michael Adler, who serves the population of Flushing, New York.

New York City, Mar 21, 2019 (IssueWire.com) - Dr. Adler specializes in physical therapy and sports medicine and offers a complete range of multidisciplinary services for patients of all ages and fitness levels through his private practice Flushing Physical Medicine and Rehabilitation Center. Dr. Adler treats a wide variety of patients that range from infants to the elderly and pregnant women to athletes. In addition to his knowledge in the training and practice of physical therapy, Dr. Adler's social skills, sense of responsibility and desire to provide quality services distinguishes him from the other doctors in his field.

Dr. Adler's patients have great experiences with him, one stating, "He is very understanding, and very interested in my healthcare. I have been searching for a great doctor and I believe I found a very caring & knowledgeable physician willing to spend time listening and asking very important questions about my health."

Dr. Adler graduated with his Doctorate of Osteopathic Medicine Degree from the New York College of Osteopathic Medicine in Old Westbury, N.Y., in 2005, giving him over a decade of experience in his field. Dr. Adler then completed a Rotating Osteopathic Internship at St. Vincent's Midtown Hospital Manhattan, N.Y. prior to commencing a residency in Physical Medicine and Rehabilitation at Long Beach Medical Center.

To stay up to date in his field he remains a professional member with the American Osteopathic Association, The American Osteopathic College of Physical Medicine & Rehabilitation, The Medical Society of the State of New York, Osteopathic Medical Society, and the Medical Society of Queens.

Physical medicine and rehabilitation (PM&R), also known as physiatry or rehabilitation medicine, aims to enhance and restore functional ability and quality of life to those with physical impairments or disabilities affecting the brain, spinal cord, nerves, bones, joints, ligaments, muscles, and tendons. A physician having completed training in this field is referred to as a physiatrist. Unlike other medical specialties that focus on a medical "cure," the goals of the physiatrist are to maximize patients' independence in activities of daily living and to improve quality of life. Physiatrists are experts in designing comprehensive, patient-centered treatment plans, as well as utilizing cutting-edge technology and time-tested treatments to maximize function and quality of life for their patients, who can range in age from infants to octogenarians.
