

## Covers in Play Inc. Pool Enclosures Offer Round the Year Enjoyment of the Outdoors

Pool Enclosures Offer Round the Year Enjoyment of the Outdoors

**Richmond Hill, Apr 20, 2019 ([Issuewire.com](http://Issuewire.com))** - Retractable patio and pool enclosures from Covers in Play Inc. allow using outdoor areas throughout the year without the weather playing spoilsport. Be it the UV rays of hot summer months or harsh Arctic winds of winter, your enclosed swimming pool stays usable 365 days a year.

The superior structure consisting of extruded aluminium frames, supported by stainless tension rods that are able to withstand greater loads than the standard frames available in the market. The frame is finished with premium quality architectural paint which conforms to American Architectural Manufacturers' Association (AAMA) specifications and is resistant to moisture, chalking, and chemical wearing. Roof panels used are twin walled polycarbonate material with vertical surfaces glazed with acrylic. Double weathered seals and thermal brake fasteners are used to prevent heat loss.

The most amazing benefit of the [retractable pool enclosures](#) is that they can be opened with a simple button push that operates an electrically automated drive system. Covers in Play Inc. retractable systems can be opened partially or completely as per your needs, and the entire operation is extremely convenient. It doesn't end here either, Covers in Play Inc. boasts another one of a kind feature. They have developed automatic pool reel system without tracks or guides along its sides. They have the only trackless automatic pool cover system in the world. It is absolutely necessary to attach a solar cover to the unit. Last but not least, the pool cover floats on the water and you can't stand on it. Isn't that unique?

If you are planning for an all-weather [swimming pool](#) then these retractable enclosures are the best solution to opt for.
