

New Print Head Doctor 15 Automatically Recovers Any Inkjet Print Head

Digital Sign Technologies Inc. is releasing a new update for their flagship Print Head Doctor machines. Designed to clean any inkjet print head seamlessly, the new PHD15 can run complex cleaning programs completely unattended.

Toronto, Apr 25, 2019 (IssueWire.com) - The new [Print Head Doctor 15](#) now cleans inkjet print heads in a fully automatic mode. It can switch any of its ports between pressure and vacuum, enabling it to run complex recovery programs in one set-up, without any operator intervention. The new machine can safely clean the whole range of print heads, from Epson DX to Kyocera KJ4. You can create custom recovery programs and remotely control a PHD15 machine via the Android app.

The Print Head Doctor machines can save users thousands of dollars by recovering their clogged print heads while simultaneously improving nozzle flow and color gamut.
