

## New Emergency Disaster App Released That Helps Users to Get Their Lives Back to Normal Again

**San Francisco, May 9, 2019 ([Issuewire.com](http://Issuewire.com))** - Just in time for the hurricane season or any other disaster, the myhipsmart app is the only app that can save, time and maybe even lives. Based on the founder's real-life catastrophic total loss of his home, property, and possessions, Wayne Merry promised this would never happen again to him, his family, or friends. Based in North Carolina at the time of the disaster and now in Florida storms are dangerous and may even cause loss of life.

These storms may cause 1. Physical damage 2. Financial losses 3. Plus emotional losses as well. But the key to avoiding these factors is planning! The app breaks the factors into 3 specific categories. First, Before the storms preparation and planning. Second during the storm with real-time monitoring from emergency systems and their local media. Third, Get back to normal actions. Each category asks the user simple questions that they then load the answer into the cloud-based software. Just a few of the important questions are:

Where should my family go to in an emergency and whom outside of the area should be the liaison to field the calls? ie: St. Mary's High School (link for the GPS). Grama Jones in NJ.

Your power companies real-time website for outage maps and information.  
Insurance company's claim site. Our Home insurance number is HM5757-75

All answers can contain our patented "quick link" to sites that can expedite the situation.

As a pet lover, we are also introducing a lost and found pet web site absolutely free for after the storm.

Current users like the fact that they can prepare, monitor the storm and also have important connections and documents ready to start to rebuild quicker. Users also like the fact important files can be also loaded into the app for easy reference.

The hipsmart app as well as helping people in a storm it also organizes their lives. It even tracks their coupons, warranties and recalls. Saving time, money and maybe even lives.
