

Rapper/Model/Actor Ray Future Releases a Hot New Single

Hype is a club banger by rapper Ray Future that doesn't follow the norm of modern day club songs.

Eugene, May 17, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Ray Future's interest in becoming an entertainer and his love for music was realized by spending time freestyling with his friends in his parent's basement on a Friday night. In the spring of 2015, producer/writer Montel Jones called Ray Future's father and asked if he would be interested in spending a Saturday afternoon in the studio. When asked, Ray Future responded with "Yea, this is my one shot". By early evening the next day, Ray Future had written and

recorded his first song, "Meditate" and from that day a rap artist was born. Montel said, "its time to put Ray Future through the artist development stages to groom him into a major music artist and to not just be a rap artist".

Ray Future born in Olathe, Kansas now living in Oregon has dropped a hot new studio single entitled "Hype". The song is a true bona fide club banger that will have you moving with the beat throughout the entire song. Hype is available on all digital download and streaming stores in 140+ countries and will soon be released to radio, TV, and gaming systems. The single is distributed by BreeMar Distribution.

Producer/writer Montel Jones says "Hype is not the mumble rap song that is heard in today's rap industry". The beat with Ray Future's rap style will remind you of the styles from the 90's such as Eminem, L.L. Cool J, Snoop Dogg, and Nas.

Ray Future is a mainstream rap artist with a nonjudgmental philosophy for the industry and looking forward to sharing his experience, knowledge and drive that been placed upon him to be successful in the entertainment industry.
