Apart from this, the study evaluates the competitors in a specific country. Another critical aspect that is covered by this literature Teleradiology Services Market is the effective assessment of small marketing campaigns.

## Trend of Outsourcing Radiology Services in Developed Countries

Developed countries extensively outsource radiology services to cost effective countries in Asia, to

handle the bulk of radiology reporting requirements. These countries can work for a relatively fraction of cost which is profitable to the teleradiology service providers. Additionally, developing countries have well trained radiologists which helps to identify, classify, and quantify patterns in medical images and can effectively interpret results more accurately. All the above factors are anticipated to positively contribute to the growth of the global teleradiology services market.

## **The rise in the Incidence of Chronic Diseases**

The surge in the incidence of chronic diseases such as cancer, arthritis and coronary heart disease is anticipated to propel the overall global teleradiology services market. According to the World Health Organization, chronic disease prevalence is expected to rise by 57% by the year 2020. Emerging markets will be hardest hit, as population growth is anticipated be most significant in developing nations. Moreover, almost half of the total chronic disease deaths are attributable to cardiovascular diseases; obesity and diabetes are also showing worrying trends, not only because they already affect a large proportion of the population, but also because they have started to appear earlier in life. According to Cancer Research UK, there were 17 million new cases of cancer worldwide in 2018. These factors have been crucial for accelerating in the growth of the global teleradiology market.
