In Think Before You Think, Harish creates a paradigm shift by explaining in a refreshingly entertaining and practical way -how our thoughts shape our personality.

It is not the things in your life, it's your thinking behind the things that shape your destiny.”—
Harish Gulati

-- For a number of years, one of the most important ideas I have learnt and taught about is the power of 'thinking outside the box' -- with a sense of adventure. We must challenge the status quo - to bring innovations, explore the unknown, invent new paths, and push boundaries to stay on the cutting-edge, or often, to create it!

Inside every person is more potential than the person themselves often realize, and we must challenge ourselves to constantly learn and grow every single day.

In Think Before You Think, Harish creates a paradigm shift by explaining in a refreshingly entertaining and practical way - how our thoughts shape our personality, which in turn creates our personal reality. He emphasises on the fact, that lasting happiness and joy do not come from achieving new goals or change in our circumstances; it comes from living life in a beautiful state, in the present moment, and getting rid of the 'interference - toxic thoughts' that cause suffering in life. This one idea alone will literally transform the way you approach living your life and also the way you approach helping others journey to greatness.

This book provides insight into human behaviour and new ways to approach old problems. The use of simple language, images, and illustrations used to convey the message across makes it appealing to readers of different ages and background. It provides a roadmap to everyone who wants to live an extraordinary life, a life by design- filled with energy, purpose and meaning.
