

## **Under New Management - Green Dental & Orthodontics New Office Manager - Joseph Savory**

Welcoming Our New Office Manager - Joseph

**Sherman Oaks, May 28, 2019 ([Issuewire.com](http://Issuewire.com)) - Under New Management**

We are excited to announce that Joseph Savory will be joining our team at Green Dental & Orthodontics as our new office manager. As office manager, he will be working to bring even better services and care to our returning patients while also bringing our cutting-edge treatments and expansive oral care plans

to new patients throughout the region who are looking for a one-stop office for all of their oral care needs. Our office provides routine and general dentistry services along with periodontal, cosmetic, restorative and orthodontic treatments through our Dentist and our specialists.

Joseph Savory is originally from New England but has been proud to call the Los Angeles area home for 13 years. With three children in college and one still at home, Joe is a busy dad who loves having fun with his family and enjoying the numerous outdoor sports and activities that Los Angeles offers. At work, Joe's goal is to provide every patient with the best possible oral care. He wants to keep oral care affordable by providing a variety of payment solutions as well as by improving pricing for all of our patients. In addition, he will focus on regularly updating our special offers so that you can get amazing treatments from our Dentist at equally amazing prices.

Joe also ensures that all of the staff at our practice are friendly yet professional, offering quick but thorough appointments and addressing each of the unique needs of our patients. By creating a more efficient case management system, all of our staff will be able to provide comprehensive patient care without letting any patient or any treatment fall through the cracks. Overall, Joe knows that a practice offering high-tech, cutting-edge technology along with positive experiences every time you come through the doors will make patients feel happy and confident in the care they are receiving at Green Dental & Orthodontics.

As office manager, Joe is excited to be working with our team of caring professionals, including our general Dentist, hygienist, specialists, and the entire office team. Dr. Basil and Dr. Ray provide general, cosmetic and restorative dentistry while Dr. Mark Cohen provides periodontal care and Dr. Amir provides orthodontic treatments. We use the latest technologies, including digital X-rays, cone-beam CT scans and the Sirona soft tissue periodontal laser for gingival surgeries. Our commitment to providing the very best care at all times also means that we use the highest-quality oral care supplies and dental labs. Our high standards encompass all of our work, and you will love your experience here from the moment you enter our doors to the end of your time in our chairs.

We encourage you to make an appointment with us today and discover why our patients love our practitioners and our office as a whole. We know that you will enjoy our open office space, our comfortable appointment rooms and our modern technology that keeps you comfortable during your appointment and that keeps your teeth and gums healthy throughout your life. With Joseph Savory on our team, we also now have the advantage of his 24 years of experience in the oral care field, and his ability as an office manager to help us build an even greater team for your advantage.
