

Dylan Parkes' New Song 'Missing You' Exemplifies Rock Entrails with a Musical Versatility of It Own

The creative symbiosis between distorted rock riffs put together in a blissful blend of lyrical appreciation in Dylan Parkes' 'Missing you' is a visionary in itself.

Birmingham, Dec 31, 1969 ([Issuewire.com](http://www.Issuewire.com)) - **Dylan Parkes** has gone and climbed the hills of everything that could have emerged as a hindrance in his incredible career and put together each and every elemental transcript of music-making with his own hands. His song '[Missing you](#)' from his newly released album Unfolding Momentum is a layered ambient sound amalgamating the various

quintessence of indie glazed rock with a lyrical mellifluousness of dynamic modulations, reflecting everybody's stories in compact formatting. **Dylan Parkes** has an affinity for shoegaze rock that blurs the distinctions between the collective instruments, all played by him and his atoning vocal qualities in one flow of musical linearity

Based out of Birmingham, UK and currently signed to Sunejim Records, **Dylan Parkes'** biggest inspirations rest with Pink Floyd, The Beatles, Mike Oldfield, and Noel Gallagher's solo act, all of which worked as instruments in adopting his own finger-picking styles with a melodic and subtle tryst between his lyrical slopes and timber management. However, the sense of ache and tenderness in his songs are all dedicated to his deceased mother, especially in '**Missing you**'. His other songs from his album including 'Self Belief' and 'Fade Away' also have the distinction of emotional qualities in the spectrum of rock. His new album is already in line for a release that will have songs named '[Unfolding Momentum](#)', '[A Prayer](#)', and '[Seasons](#)'. Be a part of this journey through the virtuous perspective of musical senses by following **Dylan Parkes** on Facebook, Spotify, iTunes, Facebook, YouTube, and his own website right away.
