

Kuro™ launch reduces the time, costs, and learning curve of launching Life Sciences products

Kuro helps life sciences companies to launch faster and at a fraction of the cost of building infrastructure themselves. Kuro provides order fulfillment, inventory tracking, invoicing, and customer support to customers by paying only per transaction.

Kuro™

Minneapolis, Jul 30, 2019 (Issuewire.com) - One Life Sciences™, a provider of innovative medical and life sciences focused services and software, announced the launch of Kuro™ today. Kuro™ is a service and software package that streamlines operational, logistical, and analytical challenges faced by life sciences companies, especially start-up and growth companies serving the MedTech and life sciences sectors.

“Life sciences companies today face a host of challenges. Often, innovators may be expert in the clinical or laboratory use of their innovation, but lack the time or interest of building critical operational infrastructure that allows their innovation to be commercialized”, commented Trevor Lee, MBA, CMA, the Managing Director and CFO at One Life Sciences. “Kuro™ tames the chaos of order fulfilment, invoicing, inventory tracking and customer support. Kuro™ does it all for MedTech companies under a simply pay-for-what you use pricing model,” said Lee.

Using a consolidated system approach, Kuro™ allows life sciences companies to manage all aspects of their product distribution and customer-facing functions in a straight-forward regulatory compliant and scalable way. “In the past, life science companies were forced to hire specialist teams, develop siloed, DIY systems, and sign long-term sticky leases for their operational needs. Kuro™ allows companies to eliminate the diversion of capital and time to operations by doing it for them so innovators can focus on their core competencies,” stated Matt Kyle, JD, MBA, the Managing Director and CEO of One Life Sciences. “Kuro™ allows companies to stand-up an entire operating system by plugging into Kuro’s mature, focused, and proven system at fraction of the cost to doing it themselves,” said Kyle.

About One Life Sciences™

One Life Sciences™ is a Minneapolis, Minnesota, USA based life sciences company focused on driving innovation in the health-related sciences globally through services and software that improve both the efficiency of innovators and healthcare-related capital deployment.
