

Proud to be part of Peraton's winning team!

Minneapolis, Jul 9, 2019 ([IssueWire.com](http://www.IssueWire.com)) - EXB Solutions, Inc. is excited to announce our participation in NASA's Space Exploration Network Services and Evolution (SENSE) contract awarded earlier in June. EXB is a small business partner with the prime contractor, Peraton, one of NASA's key mission partners.

EXB will provide software engineering services in support of Peraton's 5-year, \$1.8 billion awards. SENSE is a follow-on to the Space Communications Network Services contract led by Peraton since 2011 in support of the Exploration and Space Communications projects division at Goddard Space Flight Center (GSFC). As a subcontractor, EXB has supported multiple NASA programs over the last decade including Orion Core Flight Software, the Space Network Ground Segment Sustainment program and a test automation effort with the GSFC. Our engineers have worked on mission critical technologies like satellite communications, human space vehicle

control, navigation and flight management, guidance and flight control, and medical device systems.

Chris Schwartzbauer, CEO of EXB Solutions, said, “We are thrilled to be a part of Peraton’s winning team. This stellar win further reaffirms Peraton’s mission-critical capabilities and expands our footprint into space systems. We look forward to working on new projects and continued success in mission-critical space programs where EXB can leverage its three decades worth of expertise. This is a further testament to the tremendous engineering team we have here at EXB. Our engineers continue to build world-class solutions that enable the most advanced systems for avionics, space and medical devices.”

“Peraton is deeply committed to providing outstanding support to NASA missions and recognizes the niche capabilities of essential mission partners like EXB whose contributions are vital to mission success,” said Ronna Kirchoff, Vice President, Civil Space programs. With this new contract, Peraton will continue to deliver advanced communications and tracking and data relay services with a focus on the evolution of NASA’s architectural vision for enhanced space communications and navigation services.

ABOUT EXB SOLUTIONS INC.

EXB Solutions Inc. partners with Fortune 100 clients to build powerful technology for safety and mission-critical applications in the aerospace and medical device industries. Headquartered in Minneapolis, Minnesota, the service-disabled-veteran-owned small business has developed systems engineering and embedded software solutions for over 30 years. Our software solutions have helped fly successful space missions, enhanced patients’ lives through innovative, leading-edge medical devices, and advanced commercial, defense and aerospace systems. Learn more at www.exbsolutions.com.

ABOUT PERATON

Peraton provides innovative, reliable solutions to the nation’s most sensitive and mission-critical programs and systems. As a trusted provider of highly differentiated space, intelligence, cyber, defence, homeland security, and communications capabilities, Peraton is a critical partner to the Intelligence Community, Department of Defense, and select federal agencies and commercial entities. Headquartered in Herndon, Virginia, the company employs more than 3,000 people across the U.S. and Canada. For more information on Peraton, visit www.peraton.com
