

## Seth Eisenberg, MD, Psychiatrist with Illinois DHS Division of Alcohol and Substance Abuse

Get to know Psychiatrist Dr. Seth Eisenberg, who serves the population of Chicago, Illinois.

**New York City, Jul 11, 2019 ([Issuewire.com](http://Issuewire.com))** - Dr. Seth Eisenberg is an established Psychiatrist who continues to provide exceptional care and support to his patients as Medical Director within the Illinois DHS Division of Alcohol and Substance Abuse, and he is also a Training Consultant at the Great Lakes Addiction Technology Transfer Center in Chicago, Illinois. Featuring over three decades of experience in his field, he has special expertise in addiction, child and adolescent, and general psychiatry.

Dr. Eisenberg was educated at Washington University in St. Louis, earning his Bachelor's Degree in Religious Studies in 1970. Pursuing a career in psychiatry, he went on to attend the University of Health Sciences, Chicago Medical School, graduating with his Medical Degree in 1977. He remains a distinguished member of the American Society of Addiction Medicine, the American Academy of Addictions Psychiatry, the American Telemedicine Association, and the National Council on Problem Gambling.

Dr. Eisenberg is also the Founder and CEO of Recovery Rebooted, LLC, an internet recovery program designed to support client-driven efforts towards long term recovery. He is renowned as an expert in the treatment of co-occurring disorders, mental health diagnosis, integration of behavioral health and primary health care, motivational interviewing, brief interventions, recovery-oriented care, and problem gambling. He attributes his success to continuing his education and training, and when he is not assisting his patients, Dr. Eisenberg enjoys exercising, reading, and spending time with his dog.

Psychology is the science of behavior and mind, including conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope and diverse interests that, when taken together, seek an understanding of the emergent properties of brains, and all the variety of epiphenomena they manifest. As a social science, it aims to understand individuals and groups by establishing general principles and researching specific cases.
