

Modular Construction Market to witness Significant Growth by 2023.

Reinventing practices for faster, leaner and higher quality construction through cutting-edge innovations

New York City, Sep 25, 2019 (Issuewire.com) - The modular construction market is projected to grow at a compound annual growth rate of 6.9% from \$112.4 billion today to \$157 billion by 2023. About 3% of construction in America is modular and factory-built, but it is projected to reach 10% over the next 5 years due to the rise in demand for complex structures at affordable rates, rapid urbanisation, and industrialisation.

Trueventus will be hosting the **Modular, Prefab and Construction Tech Senate at New York, United States** on the **28th and 29th April 2020** in comprehensive 3 stream sessions, which includes timely keynote presentations and uncovers case-studies by renowned experts across the region.

Topics such as these and more will be covered:-

- Addressing the causes of the productivity gap in the global construction industry and introducing the right tools and strategies to overcome it.
- Exploring innovations to improve processes and workflow to drive efficiency, safety and sustainability of your modular and prefab projects.

- Delving into the cutting-edge ideas, processes and systems being developed in the construction industry across single-trade, multi-trade and modular manufacturing processes.
- Exploring the latest in construction technology - from drones and laser scanning, to robotics and AR, to IoT and automation - and how you can leverage them in your business.

During this intensive 2-day conference, delegates and speakers will connect with global trendsetters in the industry.

Look forward to the upcoming Modular, Prefab and Construction Tech Senate at New York, the United States on the 28th to 29th April 2020.

All interested brands and industry professionals are welcome to inquire for more information. Registrations for access to the event and tickets are currently open and available to the public by visiting through the following link: <https://bit.ly/2mtG11M>
