

## MONUMENTAL FOOTBALL FIELDHOUSE TO OPEN AT L'ÉCOLE SECONDAIRE CATHOLIQUE PAUL-DESMARAIS.

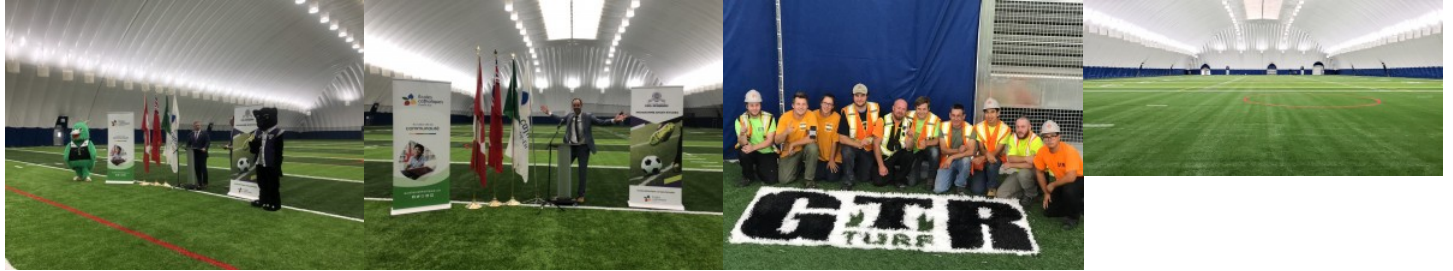

**Montreal, Sep 21, 2019 ([Issuewire.com](http://Issuewire.com))** - The NFL's Cincinnati Bengals and the Indianapolis Colts have something in common with the Ottawa Sooners. Not only are they all great football teams but, they will also play and practice on the same synthetic turf system.

The Sooners - CECCE d'Ottawa new Megadôme at l'École Secondaire Catholique Paul-Desmarais opened on Wednesday, September the 18th, 2019. This state-of-the-art 106,848 square foot multisport facility, installed by GTR Turf, has the latest generation of synthetic turf systems tailored for indoor facilities and suitable for football and soccer.

"This is the crème de la crème of synthetic turf fields! The Momentum Turf by Shaw Sports Turf is a slit-film fiber system that has a proven track record with many NFL franchises and NCAA teams. The Baltimore Ravens, The Cleveland Browns, The New York Jets, Georgetown University, Virginia Tech University, Louisiana State University, just to mention a few." Said Byron Biggs, Marketing VP at GTR Turf.

The Ottawa Sooners and the Conseil des écoles catholiques du Centre-Est chose the advanced and latest version of the Momentum system. Students of the new sport-studies program at Paul-Desmarais Catholic High School, the Ottawa Sooners, and many other athletes will play on the Momentum 51 PRO system, recognized for better performance, better safety, and the best durability.

The new dome will feature a football field, a full length 11vs11 soccer pitch and four mini-soccer fields.
