

QuickBooks Partners with Tillpoint POS & Business Management Platform

Tillpoint adds to its list of integrated software partners and is now available on the QuickBooks app store, enabling users automatic syncing of POS sales to QuickBooks accounting

London, Sep 30, 2019 (Issuewire.com) - The collaboration between Tillpoint (tillpoint.com) and QuickBooks (<https://quickbooks.intuit.com>) enables business owners to automate their accounting through seamless integration between the two platforms. Sales from Tillpoint's point of sale software will be automatically added to QuickBooks accounting upon completing an End of Day (Z Report).

All sales data from Tillpoint will be automatically synced to QuickBooks accounting, removing the need for double data entry. Tillpoint sends all accounting values, such as sales, payments, cost of goods sold, plus end of day data straight to your QuickBooks account automatically, reducing time spent repetitively inputting numbers and ready for users or users' accountants to use.

Tillpoint is available to download for free on the App Store worldwide and is free to use for 30 days while trialling any subscription plan. Requires iOS 8 or later and the newer iPad models are recommended for optimal performance.

Visit the Tillpoint website for further information: <https://www.tillpoint.com>

About Tillpoint Enterprise Ltd: Tillpoint is a startup company based in London, United Kingdom. Founded in 2012, Tillpoint has been focused on creating the perfect solution for all-encompassing, cloud-based business management.
