

# Tripler: 3X Conversion on Property Leads for Real Estate Brokers and Agents

The World's First Ever Deal Closure Guarantee with 300% increase on Property Lead Conversion Rates

**Dubai, Sep 17, 2019 ([IssueWire.com](http://IssueWire.com))** - TRIPLER uses Ai-powered technology solutions to provide brokers and real estate developers with pre-qualified & perfectly matched 'Smart Leads' that convert at 3X of normal conversion rates.

We receive online inquiries from property seekers through one of our many landing pages, social media campaigns, or through our 'Share and Earn' referral program.

One of our representatives calls the property seeker and instantly qualifies them by asking a series of questions about their property requirements.

This qualification call is recorded and the information contained in it is matched by a proprietary algorithm to agents with properties that match the search criteria.

Matched agents receive an alert on their Tripler app and they can listen, review and choose whether to purchase the voice lead. As soon as they purchase the lead, they are connected to the customer instantly.

And that's it... PROPERTY HUNTER... SMART LEAD... TO PERFECT AGENT/DEVELOPER... in minutes.

Our pricing engine only debits the estate agents account, for the cost of the voice leads that they choose to buy. It isn't easy being in the property business. Digital disruption, shrinking margins, hyper-competition...but above all a new generation of property hunter that is looking for exceptional service from property agents, delivered immediately.

Over 91% of property searches are online and we know that Property agents are struggling with the huge number of un-qualified enquires crowding their inboxes every day.

For every 100 enquires that agents respond to, on average only 3 customers will actually close a transaction with them. WE BELIEVE THAT THERE MUST BE A BETTER WAY!

Our smart technology platform perfectly matches property seekers and agents and connects them within minutes. Tripler removes all the 'friction-points' in the property search process, improves agent response times and ensures that agents are connected with only those customers that they are committed to service.

TRIPLER LOOKS TO FIND THE RIGHT CUSTOMER  
INSTEAD OF WAITING FOR CUSTOMERS TO FIND THE RIGHT HOUSE.
