

Oratium Where Blockchain Meets the Masses

Swansea, Oct 10, 2019 (Issuewire.com) - Even after the mass adoption in cryptocurrency, not up to two per cent of the worlds' population is involved in the crypto sphere. The more this technology is adopted, the more value it brings to humanity.

In a quest to bridge the gap between ordinary internet users and cryptocurrency, Oratium.io is set to build a classical video streaming platform that allows users to earn (cryptocurrency) the ORT token which is their official token that has been listed on just a few exchanges at the moment including etherflyer.com. This will be exposing a lot of people to cryptocurrency.

Oratium.io is also building an exchange where users will be able to exchange between coins and tokens, this will serve as one of the safest cryptocurrency trading platforms to trade on.

ORT token is predicted to grow to \$0.5 in the first half of 2020 and \$1 by the end of 2020, that been said, it stands to be one good asset to add to your cryptocurrency portfolio.

Oratium.io is launching [Orate.Trade](#) , a platform to help people that do not know much about trading to invest their cryptocurrencies into trading Forex.

Orate.Trade enables investors to earn without trading themselves while allowing expert traders to manage their fund and trade to make a profit for them.

Funds deposited by users are used to invest in forex trading. Orate Trade boasts of 80% success rate in all trades so this is a win-win situation. If you have been interested in making money through forex trading and cryptocurrency but have little or no idea of the technicalities involved in trading, then this is an opportunity you should grab with both arms.
