

HairMax Introduces Hairmax Laserband 82, In Singapore, For Youthful Hair Regrowth

Singapore, Nov 1, 2019 (Issuewire.com) - HairMax releases revolutionary Laserband 82, with curved band design for uniform scalp coverage

The clinically proven, FDA-cleared, and doctor-recommended hair growth laser device features 82 laser diodes for maximum light energy and hands-free treatment on the go.

HairMax, the pioneers of at-home-laser-hair-regrowth technology and the global leader in the field, has announced the introduction of their advance & avant-garde laser device in the LaserBand range, the [Hairmax Laserband 82](#).

The sleeker, smaller LaserBand 82 is one of its kind laser hair growth device featured with an innovatively created flexible band design that gets fitted all head sizes.

The lightweight device is designed for effectiveness, ease of use, comfort and speed.

The battery rechargeable device allows for freedom of movement during treatment and portability on the move.

Its built-in patented hair parting teeth help in providing effective treatment for they part your hair creating an unobstructed path for the laser light to reach your hair follicles.

In the absence of parting teeth, hair blocks plenty of laser light energy from reaching the scalp.

Treatment time through this device is the fastest available, as little as 3x30 seconds.

Addressing a press conference, the Managing Director of HairMax said, **“Being a pioneer in the at-home hair growth laser device category, we are committed to introducing the most advanced and avant-garde hair growth laser device category at various price ranges, making laser phototherapy for hair growth easily accessible to everyone.”**

“We ensure to expand our hair loss product ranges and find out options to enhance the user experience.”

The laser device brings to its user’s head safe and secure nourishing light energy that will help in stimulating hair follicles at a cellular level to promote hair growth, restore your hair’s natural growth cycle, reverse thinning, and help in growing fuller and denser hair on your head. The LaserBand transfers this therapeutic light energy through 82 laser diodes for maximum light energy, providing focused light energy.

Similar to all other HairMax laser devices, the FDA-cleared laser device is found to be highly effective in clinical studies, with considerable and favorable hair growth.

The Director of Marketing at HairMax says, “The anti-aging market has seen exponential growth in the anti-aging market ever since men and women have started seeking at-home-devices to reverse their aging signs and regain a more youthful appearance. Majority of peeps relate aging to wrinkles and sagging skin, on the contrary, the aging signs start when your hair starts thinning and becoming lifeless, thus causing baldness on your head.” **“HairMax fills that gap with their at-home-laser-treatments to help in reversing thinning hair and regaining fuller and denser hair.”**

If you are interested, the LaserBand82 is now available for purchase on www.hairmax.com.sg.
