

Most Beautiful High Quality Veg Tan Leather Wallets Ever

Perfect leather wallets made of most beautiful leather as famous as handle of LV bags. Handmade and handstitched in Japan.

Osaka, Nov 1, 2019 (Issuewire.com) - Hello, my name is Naoki Onizuka the Leather Craftsman of Primary Field Leatherworks in Osaka, Japan.

Our Kickstarter campaign has started from Oct./12/2019 and it is pledged over ¥155,000 now.

This campaign is very simple.

Good leather goods for everyone.

That is all.

Our products made of the most beautiful natural vegetable tanned leather as know as Louis Vuitton bag's handle called "V1" from Sepici Tannery in Turkey.

Every single product handmade and handstitched in Japan.

The handstitch is very important.

Everything crafted at The Primary Field is made by hand with needle and thread, nothing else. Using a traditional saddle stitch and 3 to 6 cord waxed thread to make, our products are stronger and more durable than anything made with a machine stitch.

Sewing machines use a lock stitch, which is essentially two parallel threads that can unravel if either of the threads is broken. Alternatively, a saddle stitch, which can only be done by hand, with two needles, stitch by stitch, is two threads that alternate sides to create two lines of stitching. In the event that one of the stitches breaks, the other will hold the seam together.

They are traditional and gorgeous.

Lifetime warranty.

Thank you so much.

Best regards

Naoki Onizuka
