

Police Security Flashlights Launches New MORF™ Removable Headlamps

The MORF Headlamps are Ideal Holiday Gifts

Alpharetta, Nov 11, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Police Security Flashlights, a division of LB Marketing, Inc., has launched Morf Removable Headlamps, a new category of patented wearable lights with a detachable headlamp. It becomes a hand-held flashlight or magnetic mountable light, leaving a secondary light in the headlamp base...eliminating all shadows.

Founder and Inventor Douglas Kaye explain how and why he developed the Morf Removables product line. *“As an avid craftsman, I created the concept during a home improvement project. I was working in a tight dark area in my basement crawl space. Using one of my company’s Police Security LED flashlights and also wearing one of our high lumen headlamps, I found myself alternating between the two to keep the area lit yet also juggling my hand tools at the same time. It occurred to me that the headlamp and flashlight could be merged into one functional concept.”*

Today, the MORF B300, professional-grade 300 Lumen headlamp is available as well as the B250 model, which is ideal for DIY enthusiasts. Coming soon is a heavy-duty, waterproof, rugged version and a Headlantern – the removable light expands to a lantern, making it an ideal lighting system for camping and outdoor activities and DIY projects that require an area light. According to Kaye, “The MORFs are a game-changer in the personal lighting category and have been well received by our retailers. We have plans to expand this category and bring multiple models to market over the next couple of years.”

Available for Purchase

The MORF Removable Headlamps can be found at LOWE’S Home Improvement stores, lowes.com, Advance Auto Parts, and Meijer. They are also available at policesecurity.com.

The Technology

The Morf Removable series headlamps are powered by high-quality alkaline batteries. The Removable flashlights are powered by varying power levels of lithium polymer batteries. Product specifications are available on the company website at policesecurity.com

About the company

Police Security Flashlights, a fast-growing company committed to manufacturing and delivering innovative flashlights has quickly become the dominant flashlight brand in the US and Canadian retail markets. With consumer-driven designs featuring state-of-the-art LED technology, all Police Security Flashlights are constructed with the highest quality materials and produce the brightest lights. With a focus on reliability, Police Security’s mission is to provide a wide range of value-driven flashlights in a variety of sizes, shapes and weights, for multiple purposes, so consumers can be prepared for anything. Headquartered in Atlanta, GA, Police Security Flashlights are sold in over 38,000 retail stores worldwide. For more information, please visit policesecurity.com
