

Advanced Chute System Converts Any Lawn Mower into a Powerful Leaf Mulcher

This Press Release informs the readers that Advanced Chute System converts any lawn mower into a powerful leaf mulcher.

Batesville, Dec 23, 2019 ([IssueWire.com](http://www.IssueWire.com)) - The key to a healthier and cleaner lawn is an efficient [leaf mulcher](#).

The grass clippings cut by a mower are often discharged by it on the lawn. Alternatively, these clippings are also mulched by the mower. To discharge the clippings, mowers need a powerful accessory called [lawn mower grass chute](#), which directs the grass clippings out of the lawn with the help of the rotating blades. The discharge chute also impacts outside objects like trees, landscaping, etc. Generally, switching a lawnmower to the mulching operation from the discharge operation needs you to remove the chute and then install a cover on the discharge opening. This cover traps the grass clippings in the lawnmower deck and enables the blades to cut and mulch the grass clippings.

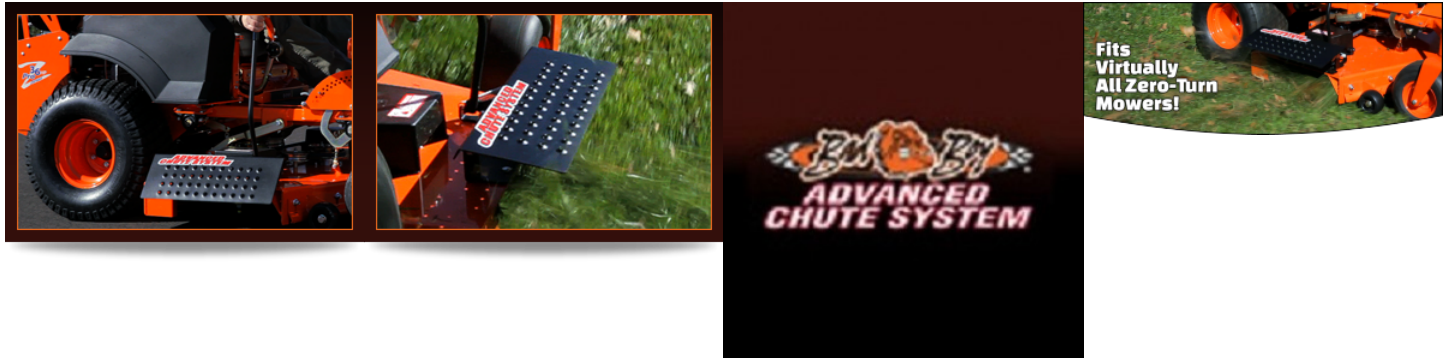

Advanced Chute System is one such powerful chute. It can be installed in minutes and features an all-steel mounting plate and steel shield with a side-mount lever. It converts any mower into a powerful

mulch machine. For more information, visit www.advancedchutesystem.com.

About Advanced Chute System

Advanced Chute System is a type of mower accessory that can easily fit all zero-turn mowers. It is the best fit for mowers that are used in high-density areas where flying debris can damage the windows, vehicles, and even people. It offers a number of features including reduced clean up time, increased safety, a decrease in the liability, and more. In addition, Advanced Chute System keeps the grass out of the flower beds, driveways and reduces raking blowing and re-mowing.

So, if you are looking for a suitable accessory for your lawn mower, Advanced Chute System is a perfect choice. For more information, feel free to call at @ **870-698-1835** or **866-698-1835** (Toll-Free). You can also visit <https://advancedchutesystem.com> for more details.
