

Jean L. Santo, MD, Regenerative Medicine and Interventional Orthopedics Specialist with Advanced PainCare and

Get to know Regenerative Medicine and Interventional Orthopedics Specialist Dr. Jean L. Santo, who serves patients in Camp Hill, Pennsylvania.

interventional orthopedics specialist who serves as the Owner of Advanced PainCare and BioHealth Institute in Camp Hill, Pennsylvania.

Everyone suffering from pain needs a medical professional who cares about them, listens to them, and creates a treatment plan specifically tailored to their needs. For this reason, Dr. Santo and her staff at Advanced PainCare and BioHealth Institute provide an unmatched level of care to each and every patient with a mission to get them back to their active lives as quickly as possible.

Throughout her academic career, the doctor earned her medical degree from Drexel University College of Medicine in Philadelphia, Pennsylvania. She then went on to complete her internship in general surgery at Lehigh Valley Hospital Center in Allentown, Pennsylvania, followed by her residency in anesthesiology at Thomas Jefferson University Hospital in Philadelphia. This was followed by a fellowship in pain medicine at the Medical College of Georgia in Augusta, Georgia.

“I decided to go to medical school because no other profession came close for me. I see how pain affects people, their families, and their lives. There was never any doubt what direction I would take once entering into medical practice. I made a promise that I would always listen to my patients and do everything possible to help make a difference in their lives. One of the things my patients often comment about is how I listen to them and make them feel cared for.” stated Dr. Santo.

To enhance her skills as a health professional, she remains a member of numerous professional organizations, including the American Academy of Pain Medicine, the American Academy of Ant-Aging Medicine, the American Society of Interventional Pain Physicians, the Spine Intervention Society, the Pennsylvania Medical Society, the Interventional Orthopedics Foundation, and the American Medical Association.

Among the doctor’s various accomplishments, she is board-certified in anesthesiology by the American Board of Anesthesiology, whose mission is to advance the highest standards of the practice of anesthesiology. She is also board-certified in pain medicine by the American Board of Pain Medicine, whose mission is to improve the quality of pain medicine. Furthermore, she is certified in age management medicine by the Cenegenics Education and Research Foundation.

Regenerative medicine is a branch of translational research in tissue engineering and molecular biology which deals with the “process of replacing, engineering or regenerating human cells, tissues or organs to restore or establish normal function.” Regenerative medicine specialists are experts in the field of stem cell and platelet-rich plasma treatment.

Interventional orthopedics is a new medical specialty that utilizes the unlimited potential of platelets and stem cells that are injected under X-ray or ultrasound guidance to heal common orthopedic conditions. It acknowledges a thorough understanding of the anatomy, biomechanics, and approaches to successfully place a needle under guidance into a given structure. An interventional orthopedic specialist is a physician who specializes in this particular field.
