

Robert L. Ebeling, III, MD, a Radiation Oncologist with Cancer Care Of North Texas

Get to know Radiation Oncologist Dr. Robert L. Ebeling, III, who serves patients in Denton and McKinney, Texas.

New York City, Dec 28, 2019 (Issuewire.com) - Licensed to practice medicine in Texas and Georgia, Dr. Ebeling III is an established board-certified radiation oncologist who treats all types of cancers, but specializes in breast, gynecological, lung, skin, and brain cancers. He can be found on staff at Cancer Care Of North Texas in Denton and McKinney, Texas.

Cancer Care of North Texas was established to give area patients a compassionate alternative to cancer treatment. There, Dr. Ebeling III brings his enthusiasm and expertise in brachytherapy, a very

specialized form of radiation treatment, to help enable selected women to have their breast cancer treatment completed in only five days instead of the typical 6 weeks of daily therapy.

In his professional experience, he has spent time in Piedmont Healthcare System (Fayette location in particular). He used his knowledge of cancer treatment to help Piedmont Fayette and Piedmont Atlanta achieve M. D. Anderson Certified Network Member status, thereby becoming an M. D. Anderson Certified Member Physician himself.

Born in Austin, Texas, Dr. Ebeling III attended college at Baylor University, graduating Summa Cum Laude with a double major in Philosophy and Biology. He earned his medical degree from the University of Texas Medical Branch at Galveston in 2008, before going on to spend his intern year at Baylor College of Medicine in Houston. He then did his residency in radiation oncology at Tufts Medical Center in Boston, Massachusetts, where he learned the most advanced techniques and modalities to treat cancer.

Following his education, he became board-certified in diagnostic radiology by the American Board of Radiology, which is a not for profit physician-led organization that oversees the certification and ongoing professional development of specialists in diagnostic radiology, radiation oncology, and medical physics.

The doctor is a member of the American Society for Radiation Oncology, the American Society of Clinical Oncology, the American Radium Society, the Texas Medical Association, and the American Brachytherapy Society.

Radiation oncology is a medical specialty that involves the controlled use of radiation to treat cancer. It is one of the three primary specialties, the other two being surgical and medical oncology, involved in the treatment of cancer. A radiation oncologist is a specialist physician who uses ionizing radiation in the treatment of cancer.

Attributing his success to his relationship with the faculty, good education, and a passion for helping others, Dr. Ebeling III is married with two daughters, Eve and Cora. When not helping his patients through their journey with cancer, he enjoys hunting, fishing, cooking, listening to music, as well as spending time with family. His favorite professional publication is the International Journal of Radiation Oncology.
