

## Daniel E. Laing, RN, CNOR, a Registered Nurse & Certified Nurse, Operating Room with Riverview Medical Center

Get to know Registered Nurse & Certified Nurse, Operating Room, Daniel E. Laing, who serves patients in Red Bank, New Jersey.

New York City, Jan 27, 2020 ([Issuewire.com](http://Issuewire.com)) - Daniel is a registered nurse & certified nurse,

operating room who specializes in critical care nursing and mental health nursing. He can be found on staff at Riverview Medical Center in Red Bank, New Jersey, where he strives to make sure that his patients receive the best care possible.

Riverview Medical Center offers the convenience and personalized service of a community hospital, combined with state-of-the-art technology such as CyberKnife®, linear accelerators for cancer care, robotic surgery systems, a tele-ICU, and other resources most often found at leading medical centers throughout the country. Working with physicians and specialists from the top medical schools and residency programs in the nation, the team has treated generations of families throughout the region for 90 years.

From 1969 until 1973, Daniel served as a Navy Corpsman Medic for the Marine Corps. A Vietnam veteran, he earned his Associate's Degree in Nursing (ADN) from Brookdale Community College in Middletown, New Jersey in 1975.

Attributing his career success to his drive, he holds certifications in Advanced Cardiac Life Support (ACLS) and Basic Life Support (BLS - not intended for postnominal use). Additionally, he is a member of the Association of periOperative Registered Nurses (AORN). Representing more than 41,000 registered nurses in the United States and abroad, AORN is the leader in advocating for excellence in perioperative practice and healthcare.

A registered nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.

A Certified Nurse, Operating Room (CNOR), also known as a perioperative nurse, is an RN who manages the operating room. Before procedures, they help prepare patients for surgery and get all the necessary tools ready. They also work closely with the operating surgeon during the procedure by having tools ready and monitoring the patient's vital signs, like breathing rate and heart rate.
