6x7 Networks and Equinix (NASDAQ: EQIX) to construct into 14 Datacenter, 1.1gw Ashburn IBX Campus.

6x7 Networks and Equinix (NASDAQ: EQIX) in joint project to construct new Telecommunications SuperCarrier into the $1BN, 14 Datacenter, 1.1gw Ashburn IBX Campus, creating 600g Point of Presence Campus-wide in Ashburn, VA

Ashburn, Feb 6, 2020 (Issuewire.com**)** - 6x7 Networks, the world's only fully encrypted Global Telecommunications Carrier, announced today Fourteen (14) new points of presence new Point-of-Presence (PoP) the Equinix International Business Exchange (IBX) Campus, in Ashburn, VA. The facility currently contains 316,000 kW of critical IT capacity and services early, middle-market and Fortune 1000 corporations and other global telecommunications carriers such as Verizon (NYSE: VZ) and CenturyLink (NYSE: CTL) and GTT (NYSE:GTT).

 These new facilities underscore 6x7's goal of providing businesses and networks in the Virginia and Washington DC Area with additional connectivity options, enabling greater bandwidth and reduced latency through connections as fast as 600GE (600 gigabit Ethernet). Additionally, customers of the Equinix Ashburn IBX Campus will experience improved fault tolerance, load balancing and congestion management infrastructure capabilities for the delivery of both IPv4 and IPv6 access services, as well as fully encrypted layer2 transport to Amazon AWS, Microsoft Azure, and Google Cloud and Government Cloud services from all providers. They will also have the opportunity to exchange traffic with 6x7's rich global network.

 "Northern Virginia is quite simply the largest datacenter market in the United States, period, full stop." Says Benjamin PD Cannon, CEO, 6x7 Networks.

"1.1 Gigawatts" – that's not a typo or a false statistic Ms. Cannon insists – "that's a real number describing the real capacity, the region has over 1,097MW of provisioned power in what, thanks to the US Government, is now one of the densest fiber regions in the world."

"In addition, the Equinix Ashburn Campus is the largest internet peering point in North America, and a major strategic telecommunications hub between the eastern United States and Europe."

"Up to 70 Percent of the world's internet traffic flows through Loudon County's nearly six million sq. ft. of data centers each day, making this location right adjacent to the Nation's Capitol a critical telecommunications hub in every sense including National Security." Ms. Cannon continues. "With a combined 316MW of power capacity, approximately a third of the entire region's provisioned power, this is one of the densest, largest, and most interconnected campuses in the world."

6x7 Networks operates the only fully encrypted global telecom carrier network in the world, meeting FIPS-140 encryption standards, from the core to edge, and it's customers include other telecommunications carriers, cellular networks, Fortune 100, middle market, and emerging startups with exotic telecommunications needs.

About 6x7 Networks

6x7 Networksis the world's only fully encrypted Global Telecommunications Carrier.   Serving the data communications needs of enterprise businesses, government, healthcare, finance, and national interests across the globe for over 26 years, 6x7 applies government-grade security on all links to meet or exceed FIPS-140 standards in hardware on it's redundant and highly-available global telco backbone. To better serve it's customers; 6x7 owns and operates 2 Carrier-Neutral Datacenters in San Francisco and San Mateo, in addition to its bay area, California, Chicago, NYC, and global network of POPs which are integrated into other wholesale carrier partner networks in order to deliver a global wholesale footprint to the carrier community. This insures a cost-effective, scalable and resilient network that is committed to the wholesale environment and their respective clients. For more information, visit www.6x7networks.com.

About Ashburn

In the heart of the Federal Government sector, with a large enclave of telecommunications carriers and cloud providers, CBRE reported that Northern Virginia is the first data center market in the world to surpass 1,000 MW, with a growth spurt of 25% in 2019. Northern Virginia data centers captured 73% of the primary wholesale colocation demand in the first half of 2019, and holds 60.4% of the primary market that is currently under construction
