Connor Jay Proctor has a very uncommon appeal towards music which he believes something that can well define him. The panache musician has not followed any particular pattern of cadence in the latest EP with songs like '**Event Horizon**' and '**Walk Slow**' which derives remarkable metallic beats with sine waves and synchronized bass drops. His music is a part of a mystic belief that has evolved him, giving a bigger meaning entitled to his puny life. His songs are greater than a musical composition. It is pure emotion, a higher connection with the mind, body, and soul.

'**Gorilla Glue**' has a clear touch of saxophone infiltrated light jazz rhythms mixed the zestful synth hooks that produces jolting beats. Whereas the beats produced in '**Get Real**' with a beautiful surreal female chorus shows off his versatile candor. He recently finished Ill.Gates Liftoff tour 2019.
