

Electus Global is Granted Canadian Patent for its Education Technology

We are pleased to announce
the Canada Patent Office
has granted our patent
for
Life Hub Learning Center

lifehublearningcenter.com

Tampa, Feb 24, 2020 (Issuewire.com) - Electus Global Education Co, Inc. is a Tampa-based education technology company that designs, manufactures and distributes a globally patented A.I.-powered home-based integrated computer system that revolutionizes how children aged 3 to 14 learn financial, entrepreneurship and life management skills.

Our ground-breaking education technologies also address some of the most critical social and economic issues today including poverty, opportunity equality, wealth/income equality, social justice, upward/social mobility, and economic empowerment.

Electus is pleased to announce the grant of its Canadian Patent for its flagship education technology, patent application no. 2917137. The grant of that patent provides further recognition of the quality of the innovation being carried out by Electus' team.

With the Canadian grant, Electus' portfolio of global patents grows to 42 nations, including US, EU, Australia, New Zealand, and Canada, covering 75% of developed nations with a population of 1 billion.
