

## Neilsoft Hosted a Successful CADISON India Conference 2020 (CIC-2020)

**Pune, Feb 4, 2020 ([Issuewire.com](http://Issuewire.com))** - The CADISON India Conference 2020 was held on 22nd & 23rd January in Pune, India. This conference is being organized exclusively for the CADISON Users who are part of the CADISON journey and already getting benefited as the solution for Plant Engineering & want to explore more of its capabilities. Yearly this grand event of CADISON is being organized on a global level; Germany is the home for the mega event for our International Users and Pune, Maharashtra is the abode for the Indian Users. This year, almost 70 participants attended this event and it was astounding to see the enthusiasm of the participants, especially they were very excited about the theme of the event – Superior User Experience.

The event started with the welcome speech of our President of Neilsoft Solution, Mr. Raghuram. His dynamic diction about the objective of the CIC 2020 and how with every new feature, CADISON is also improving its User Experience with the new interface and much easier functionality. The audience seemed to be very excited when he announced the new Release of CADISON R19 with more enhanced features (like new IFC Interface, Process Step Documentation Functionality & many more) and

improved UI for the CADISON Users.

### **Day 1 of CIC 2020**

The first day of the event was dedicated to the new features & functionalities and the enhancements in the new release (R19). The strategically planned sessions were presented systematically to the users where each and every new capability was introduced with greater details and shown with live demonstration. The favorite sessions of our audience were the two success stories of our Esteemed Customers which is presented by our Users themselves. They covered the different projects which have been delivered with CADISON and shared the experience project execution with CADISON with the audience. The first day of the event ended with the VR experience session, where users get to learn how CADISON models can be converted and used in the VR environment. Also, Users got to experience the walk through the model to visualize the reality before the construction.

### **Day 2 of CIC 2020**

CADISON experts work round a year to congregate all the feedbacks, queries and issues faced by our Users. Then a thorough analysis of all of these was being mapped with the current market challenges and trends were being mapped. By going into the depth of such issues we come up with each session of day 2. The CIC 2020 ended with the final question-answer session and feedback from all the participants which will help the CADISON team to chalk out the roadmap and future of CADISON.
