

The best kept secret on the Atlanta music scene!

The coming of Max Payne Shawty!

kapwing.com

Atlanta, Feb 25, 2020 (Issuewire.com) - Dr.Dre once said, "I don't take on a project because I feel I can revive someone's career, or make someone famous, I take on a project if there is a marriage between what they do and what I do!"

"The Scottie (Pippen) project!" released on Feb.26,2020 is filled with such marriages!

This Album is a throwback to those times when you could play an LP in its entirety because you liked every song on it, and even the song line up was weaved together so that each song fed into the next perfectly!

Like the Chronic, or Lauryn Hill's first album, or D'Angelo! Remember? Yeah...

Stanley Dunbar Jr. aka Max Payne Shawty, as a producer, production engineer, and sometimes Artist, is perhaps one of the best-kept secrets in today's popular music scene, though maybe not for long after the release of "Scottie!"

Though having been involved in literally hundreds of successful productions from coast to coast, as producer, engineer, and/or musician, Stanley Dunbar Jr, is a rarity in the world he creates his art in!

He doesn't party except home with a few good friends, and you won't find him at the clubs except to promote an event, or support a friend!

You will find him at home, seated at his gear, working/playing/learning!

His production company, Da Muzic Productions is fully self-contained, an actual "think-tank" with open discussions, and classes about Production Techniques, Artist development, Stage Craft, and an in house vocal performance instructor to unlock the secrets to breathing, and timing!

It is easily seen what is done here, is done for the love of it!

The music here that has propelled these Artists' to write what they wrote, and say what they said in the way they said it, is not just a bunch of loops and repetitive beats!

The music is musical, intricate, there is true musicianship here, and the appreciation of the Artists' involved shines through in the various marriages!

The "Scottie!" CD is not just a collection of various Artists' put together unrelatedly, it is a well thought out musical journey into the musicianship, and minds of some of the most dynamic talents you've never heard!

There is something here for everyone!

When asked why he named this CD, "Scottie?" Max replied that "Scottie Pippen could be viewed as second best by some, he didn't really have the star power of a Jordan, but in reality, Scottie was the solid foundation that allowed Jordan to be Micheal Jordan!

This CD won't be second best to anything! But don't take my word for it, give it a listen, you can thank me later... -Music reviewer Matthew Psalm-
