Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries and extractions and perform other duties to ensure that the teeth and mouth are healthy.

Originally from San Antonio, Dr. Miller has lived in Boerne for over a decade now. He married his wife Samantha in 1994, and they have three sons together named Luke, Cole, and Rowdy. When he is not busy practicing dentistry, one can find him doing anything outdoors, including fishing and archery. He also has a special interest in Native American artifacts and spends a lot of time at various sporting activities for his sons, including baseball and football.
