Seeker

Type your request, fill your details and submit

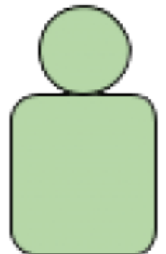

Your Request will be shown to volunteers

They will choose one

Now You will get the contact number and name of the volunteer

Call them and inform your requirement.

Volunteer

Coronavirus is spreading all over the world especially in the USA and it is almost in every state, this includes California, specifically in Santa Clara County and San Jose City.

Our Initiative is to help the elderly people all over the country who may not come out of their homes, because of the novel CoronaVirus (COVID-19) threats. There are a lot of people who are ready to serve elders voluntarily. So this application will be a connecting medium for needy people and volunteers.

As a software development team, we intend to provide required services to help communities. So, this web application will enable volunteers to help needy seniors who are not willing to go out of the shop, for example getting medications from the pharmacy. As a volunteer, you can help the seniors by fulfilling their simple needs. Please register as a Volunteer to support the needy seniors in your area! Click on the link below to register to become a volunteer or Seniors seeking help from volunteers.
