

ConnexHealth Inc. partners with Pharmalinx Medical Centre for free medical prescriptions delivery to homes

Cobourg, Apr 17, 2020 (Issuewire.com) - ConnexHealth Inc. has partnered with Pharmalinx Medical Centre to deploy an online service that allows clients to request and confirm medical prescriptions online – these orders will be fulfilled along with free delivery to your doorstep. In light of the social distancing measures during COVID-19, this service will allow for families to safely obtain their required prescriptions and reduce travel and public engagement time.

All orders can be placed online by visiting www.connexmatch.ca/medication-delivery

A helpline has been established for assistance: 416-424-6633 or [1-833-545-7211](tel:1-833-545-7211)

The team at Pharmalinx, extended their commitment to supporting the community during the pandemic, “It is important for us that we partner with organizations across Canada and support the efforts of our frontline workers – this is a significant step for us” says Shani, Pharmacist at Pharmalinx.

“The team at ConnexHealth is excited to partner with Pharmalinx to provide vital pharmaceutical services to our clients. Professional pharmacists at Pharmalinx will be able to provide consultation, prescription filling and free delivery services. This will allow for our clients to stay safe within the comforts of their own homes while reducing risk of exposure” says Medha Saraiya, CEO & Founder, ConnexHealth Inc.

Debbie McKee Demczyk, dean, Office of Research Services, Innovation and Entrepreneurship, Durham College also weighed in. “The ability to connect and match users quickly and seamlessly with healthcare services is particularly important at this moment. We are proud to see how quickly, within the project itself, our AI Hub team was able to create the timely integration of door-to-door medication delivery services for seniors. This has allowed our industry partner to further support vulnerable community members by helping maintain critical access to medications while further supporting the social distancing measures needed to keep them safe.”

Developed in collaboration with the AI Hub at Durham College, ConnexHealth Inc. promises to streamline the home healthcare market by facilitating connections between healthcare users and healthcare providers.
