

Hum app launches as India's own photo and video sharing app

Users can also chat and sell images in the app

Mumbai, May 30, 2020 (Issuewire.com) - The Panjab Company launched **Hum**, a **photo, video, URL, and text sharing app**, today. The app lets users share their favorite photographs and videos with their friends and followers. Users can also share active links and text messages in their timeline. Hum is specially designed keeping in mind the Indian youth and their favorites.

Hum is now available for download on Google Play and Apple AppStore, for both android and iOS.

Hum app also allows users to chat with other people, all within the application. A new feature that sets the app apart from others is the feature to sell images on the platform. Some of the other interesting features are:

- Send, receive messages.
- Share & upload images, videos, and more.
- Offline access to all messages and recent conversions.
- Explore new users & friends.
- Control your privacy and settings.
- 8+ Image filters & brushes and more.
- Explore the latest posts.
- 🔗30+ new features.
