

Mitchell J. Hebert, MD, a Nephrologist with Renal Associates of Baton Rouge, LLC

Get to know Nephrologist Dr. Mitchell J. Hebert, who serves patients throughout the State of Louisiana.

New York City, May 27, 2020 (Issuewire.com) - Specializing in the diagnosis and management of kidney disease, Dr. Hebert has well over three decades of experience in his field of practice. At present, he is a part of the team at Renal Associates of Baton Rouge, LLC with offices throughout the state of Louisiana, including Baton Rouge, Gonzales, Walker, and Zachary.

Recognized as the largest nephrology practice in Louisiana, Renal Associates of Baton Rouge, LLC is a group of healthcare professionals dedicated to improving the lives of people with kidney disease in the Greater Baton Rouge area. They see patients in their 4 offices and 5 area hospitals, manage patients' dialysis treatments at 23 local dialysis facilities, as well as work hard to stay at the forefront of cutting-edge medical technology. It is the mission of Renal Associates of Baton Rouge, LLC to deliver excellent care to patients, with professionalism and compassion, in a respectful and courteous environment.

Following the completion of his medical degree from the Louisiana State University School of Medicine in Shreveport, Dr. Hebert went on to complete his residency in internal medicine at the University of Florida University Hospital. Wanting to further his education, he completed his nephrology training at the University of Florida Health Shands Hospital.

A native of Breaux Bridge, the doctor is board-certified in both internal medicine and nephrology by the American Board of Internal Medicine, which is a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world. He is also a member of the American Society of Nephrology and the National Kidney Foundation.

Nephrology is a specialty of medicine and pediatrics that concerns itself with the kidneys. It is the study of normal kidney function and kidney disease, the preservation of kidney health, and the treatment of kidney disease, from diet and medication to renal replacement therapy. Nephrologists have advanced training in treating kidney disease. They diagnose and treat kidney failure, as well as help patients by prescribing medications, offering special diet advice, and coordinating dialysis care when the time comes.
