Global Business hub, GBHUB chain technology is actively penetrating and rapidly developing into the business industry around the world

# G-IPO

## GB-PRO

**Silicon Valley, Jun 3, 2020 ([IssueWire.com](https://www.issuewire.com))** - By now, it has been tested in such spheres as **finance**. Global business hub develops Ecological Token namely "GBP" (GB-Pro). GBP is Hybrid Blockchain decentralized digital asset built on Blockchain and Google Smart Cloud Technology under G-IPO project GBHUB has developed GBP based on token economic issued and managed through Blockchain and it can be used for multiple scenarios of GBHUB ecosystem.

GBPRO is the world blockchain project that has a goal of creating a decentralized Cloud bank that should bridge the gap between the crypto space and real economy, and provide users with access to innovative banking technology. The title of the project stands for the Union of Cryptocurrencies and Blockchain International. GBPRO is currently holding I- Hatching system of the same name that will be a crucial component of their blockchain-enabled ecosystem.

By using the blockchain as a foundation, GBPRO attempts to build a digital pass technology that should facilitate the process of digitization of various industries, as well as allow access to GBPRO's digital banking system for integrating global financial assets and building independent economic system and an independent monetary system through the "Big Capital Strategy" and "Large Platform Strategy". legal entities and individuals from all around the world. The planned ecosystem will combine the speed and security of digital currencies with compliance and standardization of banking KYC and MAL protocols, which is basically what many crypto projects are trying to achieve in this sphere.

The ultimate goal of GBPRO is to develop an all-encompassing ecosystem that would provide users with access to an international blockchain world, a crypto-based digital property, and a digital data bank. The use of Ethereum smart contract would grant customers the self-executing investor and issuer rights, which includes the automated payment of dividends.

The GBHUB team launch a GBPRO to be listed on a leading blockchain world. In order to operate in a

spectrum of different fiat currencies and to facilitate cross-border transactions, GBPRO will seek banking licenses in several key jurisdictions. It will also offer core banking services such as low-cost investment products, exchange-traded funds (ETFs), crypto funds and Digital Property. Through GBPRO clients can already use its services including fiat and cryptocurrency wallets, exchange and payment processing services. They can also order cryptocurrency debit cards(VISA, MASTER etc), which can be linked to Bitcoin, Ethereum, USDT wallets. Visit us at: <http://thegoogleproject.com/>
