

Live Online Training – a brand new service from MRS Training & Rescue

Bringing our instructors to you via live Microsoft Teams video classrooms

Mansfield, Jun 29, 2020 ([IssueWire.com](http://www.IssueWire.com)) - As an alternative to the courses we run at our training centres, we have introduced live, instructor-led online virtual classroom solutions that offer an engaging and enjoyable experience and replicate our face-to-face training experience.

Our Live Online courses bring our instructors to you via Microsoft Teams video classrooms, which not only reduces social contact but also saves travel cost and time.

It's not a webinar or e-learning

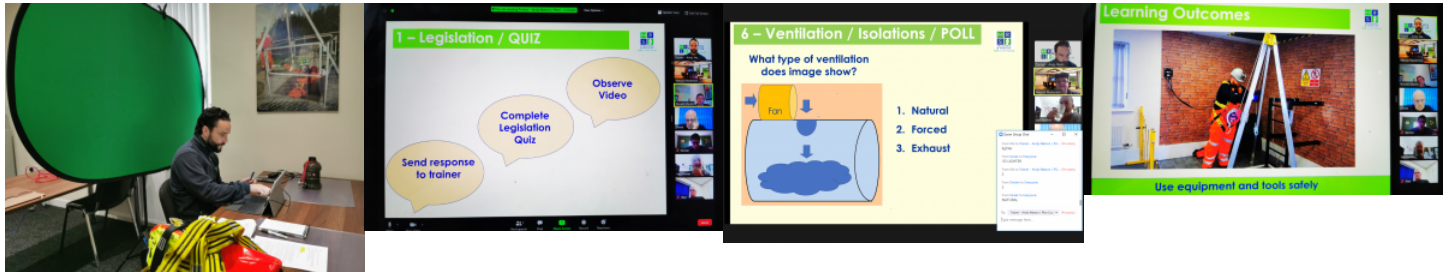

Our live online courses are delivered live by one of our expert certified, experienced instructors - interactive, fun and engaging content straight to your screen. Our instructor will be delivering the course from one of our training centres - in real time. Delegates can ask questions and chat to other participants throughout the course and they'll be polls and quizzes along the way to check understanding.

Available to book now

The first course we have developed is our [City & Guilds accredited Medium Risk Confined Space course](#). This is a 2-day course and the first day is delivered as Live Online Training. Day 2 does require delegates to travel to one of our training centres (nearest to where they live), to complete the practical elements of the course and do the written assessments. We will organise a date and location for the second practical day with the delegate when they book - this does need to be done within 2 weeks of the live online training day so that the information learnt is still fresh.

Benefits of Live Online Training

- Reduces social contact for those who require it
- Saves time – our trainers come to you so less time travelling to us
- Reduces costs – less travel, hotels, meals etc
- Minimal set up - just a laptop with camera and mic and high speed internet is all you need
- Engaging and interactive – ask questions and interact - just like our face to face training
