Are you ready to listen to the next mind-blowing music release of the best producer out of the UK Aubrey Whitfield? Then, check out her Blinded by Science and tune into the track 'A Neon Hum'.

London, Dec 31, 1969 ([IssueWire.com](http://www.IssueWire.com)) - Listening to British music producer **Aubrey Whitfield** can be quite inspiring for all new-age singers or producers who are still following the orthodox music composing techniques. Well, here this well-known music producer from the UK is setting your ears to

the best humming sensational track released by the name '[A Neon Hum](#)'. In one of her Facebook sharing, the producer has stated that she usually doesn't compose a track in such a vulnerable whispery style as she has performed in the mentioned track. However, this young talented star is happy to see people enjoying her new thoughts and production style.

Having worked with many of the famous musical personalities such as - Simon Webbe (Blue), South Korean star J-Fla, Charlotte Kelly (Soul II Soul), this skilled professional has now come up with her latest musical project [Blinded by Science](#). Apart from the brand new streaming track '[A Neon Hum](#)', this musical outlet of Aubrey is featuring with many other songs based out of the genres like – alternative-pop, indie-pop, and synthpop.

Taking variations into considerations, this pro musician has also thought of featuring collaborations with some of the best musical personalities from across the globe. Bringing back the emotions and setting an entirely new yet soothing vocal approach – these are the key factors that **Blinded by Science** is currently following. Aubrey is, however, pleased to check the reviews as she goes by saying "I'm pleased that people still think my voice has the character and richness that it does on other tracks."

The debuted single '[A Neon Hum](#)' is written, produced as well as performed by this top-notch producer. This alternative pop single is a true fusion of modern synths perfectly blended with acoustic and electric guitar chords. The track portrays a fuzzy feeling that most of the people feel right after enjoying pegs together. Starting from 80s colour to futuristic kind of pop – nothing is missed in this single track. Also, her soaring enigmatic vocal leaves impression on the listeners's mind. Stay tuned to her ultimate perfection in all the old and new tracks updated on **SoundCloud**, **Youtube**, and **Spotify**. Aubrey also pleased to connect worldwide fans on social media sites like **Facebook**, **Twitter**, and **Instagram**.
