

## OneGx1, the first mini game laptop, supporting the 4G or 5G.

**Shenzhen, Jul 22, 2020 ([Issuewire.com](http://Issuewire.com))** - One-Netbook company announced its first 7-inch mini gaming laptop, OneGx1 fashion version recently. It is the world's first mini gaming laptop which supports 4G or 5G. For friends who are familiar with UMPC, the brand of OneMix must be no stranger. The OneMix series pocket laptop, no matter in appearance or configuration, they are all very good. The most important thing is that it has high portability. The smallest size is only 7 inches. OneGx1 is the latest mini-game series launched by One-Netbook in 2020.

First of all, let's talk about the highlights of OneGx1 fashion version: the M.2 expansion slot is reserved inside the device, which supports 4G / 5G Netcom module, and can also be used to expand the M.2242 solid-state disk. With the addition of 4G / 5G module, as long as there are network signals, you can play 3A games online at any time.

In terms of the keyboard, the standard WASD key position allows users to use the game without adapting to improve the game experience, bringing a smooth operation experience; and the keyboard has RGB backlight, which can adjust a variety of backlight modes; there is a hidden slot at the bottom of the device, which is used to install the detachable game controllers. It's very friendly for game enthusiasts.

In terms of appearance design, the overall size of OneGx1 fashion version is 173 \* 136 \* 21mm and weighs about 623g. The shell is made of 6000 series aviation aluminum, and CNC integrated molding process. Light blue color matching is very fashionable. The black part of the fuselage tail is the air outlet,

and the ringtail lamp is decorated around. The overall shape is very cool.

In terms of screen, OneGx1 fashion version adopts a 7-inch FHD full fit IPS screen with a resolution of 1920 \* 1200 and a pixel density of 323ppi, which makes the image quality display clearer, and the screen supports 10 touch.

In terms of configuration, it is equipped with Intel's 10th generation core i5 processor, four cores and eight threads, Max turbo frequency 4GHz, 6MB Level 3 cache, and 4Gt / s OPI bus speed. Dual channel storage, 8GB / 16GB version is available for purchase. Two specifications of 256gb / 512gb PCIe are provided for users to purchase the bundle. It supports the latest Wi-Fi6 and Bluetooth 5.0.

In terms of reserve ports, Onegx1 fashion version is equipped with the following rich ports: Micro HDMI \* 1, 3.5mm headphone/microphone 2-in-1 interface \* 1, full-featured type-C \* 1, USB3.0 \* 2, SIM + TF card slot \* 1, more ports to meet the user's needs; in terms of heat dissipation, it is equipped with double heat pipes and double vortex fans, and double air outlets are added at the tail to increase the airflow rate.
