

Arch Systems welcomes new Chief Technology Officer (CTO) and Partner Max Justice

Baltimore, Aug 20, 2020 (IssueWire.com) - Arch Systems is a premier global technology solutions provider specializing in building Information Technology solutions ensuring our customers are meeting their needs for today and tomorrow, announced Max Justice has been appointed to Chief Technology Officer (CTO) and Partner. In this role, Mr. Justice will support and promote collaborative leadership from which Arch Systems will modernize our customers by delivering solutions wherever and whenever the customer needs them. To do so, we build value-added solutions ensuring their resources are more efficient, effective, and productive.

Mr. Justice is joining Arch Systems with over 25 years of experience developing and executing multimillion-dollar deals for top international corporations, directly supporting multiple Federal agencies and senior government officials, and inspiring a people-driven approach which defined him as a leader within the United States Marine Corps. His strengths reside in offering outstanding abilities to critically analyze operations as well as organizational strategies, implementing the system and business improvements, and he is known for consistently leading teams exceeding in the delivery of service levels and objectives. Additionally, Max brings Arch a vision which encompasses an agile and accelerated transformation of Arch Systems which will positively affect our solutions and our customers which will enable their adoption of IT modernization efforts and provide guidance to ensure their success.

Most recently, Mr. Justice was a leading award-winning delivery effort at NASA, the Department of Energy (DoE), the Department of Defense (DoD) and across the Intelligence Community (IC) where he established partnering relationships with his clients and worked closely with large and small contracting organizations enabling his clients to meet their mission, goals and objectives.

"Given Max's industry and federal experience, his subject matter expertise in all things cybersecurity, as well as his extensive knowledge of the federal space, Max will be a leader at Arch Systems for a long time to come," said Vini Ehsan, President and CEO of Arch Systems. "Max has a reputation of leveraging people, processes and technology to achieve breakthroughs in performance and results. The expertise Max brings will enable us to increase our customer footprint, foster new relationships, build new technologies, and lead the implementation and integration of our iHCD Business Process Management solution with data aggregation. As a Partner, Max will execute Arch's innovative and targeted strategies which will deliver exceptional results to our customers."
